College of Engineering shows the humanoid Robots skills

The college of Engineering in Al Ain University of Science and Technology, Abu Dhabi campus, organized a demonstration session for the two humanoid Robots, NAO and Pepper, which are designed to interact with visitors in any public place, in the presence of Dr. Amer Qasim, Vice President of Al Ain University, and the Deputy Dean of College of Engineering along with Academic Members from College of Engineering.

The session included demonstrating the capabilities of each robot and how it would benefit both the academic experience of our engineering students and their future research opportunities.
